Professional Summary

Second-year B.Tech (CSE – AI & ML) student with hands-on Data Analytics internship experience and practical skills in SQL, Excel, Python (Pandas) and Power BI. Experienced in data cleaning, transformation, exploratory data analysis, visualization and dashboard development. Able to work with real-world datasets, identify data inconsistencies, answer business questions and translate analytical findings into clear, business-ready recommendations.

Education

Accurate Group of Institutions, Noida **Expected 2029**
B.Tech in Computer Science & Engineering (AI & ML) – Affiliated to AKTU, Lucknow

Experience

Codec Technologies Pvt. Ltd. **Jul 2026 – Aug 2026**
Data Analytics Intern

- Performed data cleaning, transformation and exploratory analysis on real-world datasets, identifying inconsistencies and preparing data for downstream reporting.
- Applied **SQL** and **Excel** to answer business questions by structuring analysis around relevant metrics and data grain.
- Built summary views and visualizations to communicate analytical findings clearly for non-technical stakeholders.
- Collaborated with mentors to review analytical approaches and refine conclusions, maintaining focus on data quality and accuracy.

Projects

Student Course Completion & Drop-off Analysis – SQL + Excel **2026**

- Analyzed the Open University Learning Analytics Dataset (OULAD) to trace students from enrollment through assessment to course completion by joining studentInfo, studentRegistration and studentAssessment tables using **SQL**.
- Applied **GROUP BY** and window functions including **RANK** and running totals to identify the module/stage with the highest withdrawal rate while distinguishing withdrawal rate from raw dropout count.
- Segmented results by course length and prior education level using **Excel Pivot Tables** and developed a recommendation on which stage to prioritize for student support.

Retail Return Rate Analysis by Region – SQL + Power BI **2026**

- Analyzed the Sample Superstore dataset using Orders and Returns tables to calculate return rates by region, city and product category rather than relying on raw return counts.
- Developed **SQL** queries using **LEFT JOIN** and appropriate NULL handling to identify returned and non-returned orders accurately.
- Built a one-page **Power BI** dashboard featuring a return-rate KPI, region filter and category breakdown chart for interactive analysis.
- Identified the region with the highest return rate and evaluated product mix and shipping mode as potential confounding factors before drawing conclusions about root cause.

Technical Skills

Programming & Querying: Python, SQL
Python Libraries: Pandas, NumPy
Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Descriptive Statistics
BI & Spreadsheet Tools: Power BI, Excel, Google Sheets, Pivot Tables, VLOOKUP, Excel Formulas
Databases & Development Tools: MySQL, Jupyter Notebook
SQL Concepts: Joins, Window Functions, CTEs, Subqueries
Business Skills: Business Requirement Gathering, Stakeholder Communication, Problem Solving, Critical Thinking, Attention to Detail

Certifications & Extra-Curricular

- Data Analytics Internship Certificate – Codec Technologies Pvt. Ltd. (AICTE & ICAC approved, Google for Education partner)
- Member, E-Cell IIT Bombay – Engaged with entrepreneurship and problem-solving community initiatives
